Step-by-Step Setup Instructions

1

Search for OpenCode

Open Google in your browser and search for "**OpenCode**".

2

Install OpenCode

Download and install the OpenCode client application onto your system.

3

Access the Model Picker

Launch OpenCode, open the model picker interface, and search for "**DeepSeek V4 Flash**".

DeepSeek V4 Flash

4

Select & Start Using

Select **DeepSeek V4 Flash** from the list and start prompting right away.

Quick Tip

Ensure your OpenCode client is updated to the latest version to access all supported model features seamlessly.
