

SETUP GUIDE

Hermes + Nous Portal Guide

Configuration guide for Hermes Agent and listed \$0 / free models

PLATFORM & AGENT

Hermes Agent by Nous
Research

INFERENCE GATEWAY

Nous Portal OAuth

MODEL PICKER TIER

Currently Listed \$0 Models

Step-by-Step Setup Instructions

1 Install Hermes Agent

Linux / macOS / WSL2:

```
curl -fsSL https://hermes-agent.nousresearch.com/install.sh | bash
source ~/.bashrc # (or source ~/.zshrc)
```

Windows (PowerShell):

```
iex (irm https://hermes-agent.nousresearch.com/install.ps1)
```

2 Connect Nous Portal

Run the interactive model wizard or use the one-command portal setup shortcut:

```
hermes setup --portal
# OR interactive mode:
hermes model
```

Select **Nous Portal** and complete the OAuth login in your browser.

3 Pick a Currently Listed \$0 Model

In the model picker, choose any of the models appearing as \$0 / free:

stealth/ox-alpha

upstage/solar-pro4:free

meituan/longcat-2.0:free

tencent/hy3:free

poolside/laguna-s-2.1:free

stepfun/step-3.7-flash:free

4 Start Chatting & Running Agent Tasks

Launch Hermes in CLI mode to start issuing tasks and coding workflows:

```
hermes
```

To switch models inside a live session, type `/model`.

5 Verify Portal Connection (Optional)

Confirm authentication and active provider status:

```
hermes portal info
```

Important Note on \$0 Status

Free (\$0) availability reflects current catalog listings in the picker. Quotas, availability, and rate tiers are governed by Nous Portal and may update dynamically.

Switching Models & Diagnostics

Run `hermes doctor` to check dependencies, and `hermes model` to adjust backend routing anytime.
